Testimonials

The CDP Program helped me gain a wide and deep perspective on the various facets of Diversity and Inclusion. The sessions from industry speakers, and the very composition of the batch, were instrumental in building my knowledge not just about the world of D&I but practices being implemented by various organisations to make this an integral part of their culture. Being a part of the CDP alumni is undoubtedly helpful, but the biggest opportunity for me through this course was to learn from Nimmi and her team of experts at Interweave who brought the richness of their experience and knowledge to every session.

The CDP Certification is by far the best program in terms of in-depth learning that I have attended in my working life. Each of the speakers were a powerhouse of knowledge and insights which is not otherwise available in any other forum or platform. Though I had been leading the Diversity agenda in my organisation, the learnings that I had in those days (especially the classroom sessions) opened vistas for me to further explore. As an example the PWD Act was such a revelation that now we have a full-fledged project team working on it after I got back from the program.
